CATEGORY: Radiator Fans

PRODUCT: SRP R20010F Series 10" [PULLER]

SKU: 20-3010 (PWM) | 20-3005 (ON)

Overview:

SRP R20010FS - 1135 CFM 10" Puller - High-Performance Brushless Fan is an on and off-road-ready system, capable of handling all weathering conditions and protection against sand, mud, water, fog, and chemicals. Designed for performance and longevity in mind, the power and control electronics are integrated within the sealed motor to ensure a longer useful life and reliability.

SOFT START TECHNOLOGY

Programmed into every fan is our soft-start technology. Avoid costly electrical problems by mitigating voltage and amperage spikes across the system due to poor power management systems found in other fans.

Highlights:

Height: 10.85"

• Width: 10.55"

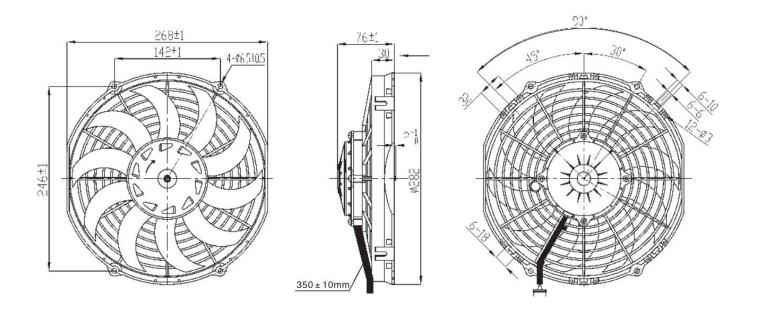

Depth: 2.99"Max CFM: 970

• Amp Draw: 7.5A @ 13.5V

- Cutting edge fan & motor blade technology
- Low Noise and vibration
- Lightweight motor design
- High ambient working temperature
- Operates in challenging environments
- IP Rating: IP68
- Duty-cycle: 50,000 hours

Additional Product Information:

- 10 16 VDC / Variable Speed
- LIGHTWEIGHT: 2.3 lbs in overall weight
- Operating Temperature Range: -40 285F (-40 140C)
- PULLER Style Fan

Designed with a curved blade and slotted to maximize performance and efficiency, the motor is purpose-built with high ferrite magnets and state-of-the-art sensor-less drives for automotive environments.
