

# DW430c

430LPH @40PSI **DW**

## 430LPH IN A COMPACT 38MM PUMP

### OPTIMIZED PUMP TECHNOLOGY

- Optimum impeller blade count and angle for peak efficiency at the target flow rate
- Advanced carbon matrix commutators for increased durability in E85 and race fuels
- Fluid dynamics engineered to eliminate turbulence and reduce restrictions
- Digitally balanced armature to extend bearing life and decrease NVH
- Integrated check valve to keep fuel system pressurized and avoid hard starts

*All the same popular fitments as the DW300c & DW65c. 20+ PNs*
